PRODUCT HIGHLIGHT

OAK Gas Collection Flow Through Cell

Used for Water-Well Testing for Coalbed Methane/ Natural Gas in Coal Operations as per the Alberta Standard for Baseline Water Well Testing.

The practical design of this equipment allows for:

- **Ease of operation**
- **Low maintenance**
- **Quick field assembly and disassembly**
- **Rugged field durability**
- **Visual detection of the presence of gas.**

The Oak Gas Collection (FTC) is available for purchase or rental and is currently the field unit of choice by a growing number of clients.

EQUIPMENT SERVICING

Is your equipment field ready?

The busy monitoring season has begun. Ensure that your field equipment is fully operational by bringing it in for:

- ✓ Inspection ✓ Service ✓ Maintenance

There is no charge for equipment inspections.

We also provide equipment maintenance and calibration workshops. Call us for more information.

INNOVATIVE TECHNOLOGIES

Oak is committed to keeping our clients informed of innovative technologies. If you are interested in a presentation or demonstration of any of the following, please contact us.

Discrete Sampling

- Snap Sampler – Collect a discrete groundwater sample at depths with no purging.
www.snapsampler.com

In-situ Remediation

- iSOC Gas Diffuser – Reduce contamination levels, achieve rapid and localized remediation, and accelerate site closure. www.isocinfo.com

Multi-Level Ground Water Monitoring

- Westbay – CMT – Waterloo – FLUTE Systems
These systems can provide more characterization data cost effectively, which enables you to better understand your site conditions.

OAK AS A DISTRIBUTOR

Oak Environmental Inc. has been supplying Alberta Water-Well and Environmental Industries for over 20 years. We are a proud distributor and supplier of many quality product lines.
