

# Oak Environmental Well Cut Off Tool

## New at Oak Environmental!

Oak has developed a brand new design for our well cut off tool. This new unit incorporates bearings to reduce friction when cutting, a totally redesigned cutting wheel, and is more rugged and heavy duty.

Simply stated, this is the most innovative addition to our product line in years. Our original cut off tool incorporated a blade that scraped material from the inside of the pipe. This new design has a cutting wheel, which slices the pipe cleanly.

Easy to use, and affordable.

Come in for a demo, or visit us online at [www.oakenviro.com](http://www.oakenviro.com) and click on the "What's New?" link.
